

Tour Plastic Free!

BECOME PART OF THE SOLUTION — AND SAVE MONEY!

Touring acts can go through 60 CASES of bottled water a month while on the road

That's 18,720 plastic bottles a year!

An average entertainment tour uses 15-20 PLASTIC BAGS PER DAY

Bags are almost never recycled

FACTS

Plastic is forever

Every bit of plastic that has ever been created still exists, except the small amount that has been incinerated and has become toxic air pollution.

Plastic pollutes the environment

Plastic creates toxic pollution at every stage of its existence: manufacture, use, and disposal.

Plastic is poisoning our food chain

Plastic breaks down into smaller particles that attract toxic chemicals. These particles are ingested by wildlife and contaminate our food chain.

Plastic affects human health

Harmful chemicals leached by plastics are present in the bloodstream and tissues of almost every person, including newborns.

Single-use disposable plastics are the main source of plastic pollution

Consumption of single use and disposable plastics has spiraled out of control.

Plastic pollution coalition is a global alliance working to end plastic pollution and its toxic impacts on people, animals, and the environment. Plastic Pollution Coalition is a project of Earth Island Institute, a non-profit public benefit corporation, Tax ID 94-288968.

3 ways to reduce plastic use on the road

1 MAKE THE GROUP—AND PERSONAL—DECISION TO AVOID SINGLE-USE PLASTICS

- ▶ Provide stainless steel or glass bottles, cups, and re-usable utensils to your band and crew.
- ▶ Bring your own to-go containers and reusable bags for your crew to use.

2 AIM FOR A PLASTIC-FREE BACKSTAGE

- ▶ Request real plates, glasses, and utensils backstage and at catering. Only permit reusable and compostable options.
- ▶ Ask for local fruits, vegetables, and snacks not wrapped in plastic.

3 FILTER YOUR OWN WATER ON THE ROAD

- ▶ You can filter water on-site anywhere in the world.
 - ▶ Small, portable products allow you to filter water inside a stand-alone bottle.
 - ▶ Larger, portable water dispensers allow you to easily filter water from any venue via the tap.
 - ▶ Certain bus companies, like Florida Coach, will install filters on your tour bus, so you can drink clean water directly from the tap!

You've got the **power** on
your rider to reduce disposable plastics.
All you have to do is ask.
